

PHILIPPINE STANDARD TIME CLOCKS

Sync-iT, SyncRight or Sync-ALL – which one to get?

Get Sync-iT if your area has Wi-Fi Internet.

Sync-iT gets Philippine Standard Time from DOST-PAGASA NTP (Network Time Protocol) using your Wi-Fi internet connection.

Examples of areas with Wi-Fi:

- Corporations with multiple branches nationwide (**banks, shopping malls, restaurant chains, hotels, telecom offices, logistics companies**)
- International and Domestic Airports
- Private Schools and Universities
- Offices, Condominiums
- Entrances, Lobbies
- Function Rooms
- Canteens, Cafeterias
- Etc...

Simply connect Sync-iT to your Wi-Fi network and start enjoying the **BENEFITS** of Philippine Standard Time (PST).

Get SyncRight if your area does not have Wi-Fi Internet.

SyncRight receives signals from orbiting Global Positioning System (GPS) satellites to automatically set itself to Philippine Standard Time.

Examples of areas without Wi-Fi:

- Public Places (e.g., **Municipal Halls, City Halls, Barangay Halls, Public Parks, Police Stations**)
- Transport Terminals (e.g., **bus stations, train stations, MRT/LRT stations, taxi stops**)
- Public Schools, Public Markets, Public Hospitals, Churches
- Shopping Mall Entrances, Village Gates
- Factories, Industrial Areas
- Garages, Parking Areas
- Security Guard Stations
- Etc...

No Wi-Fi? No problem! Simply mount the weatherproof GPS antenna outdoors and start enjoying the **BENEFITS** of Philippine Standard Time (PST) with SyncRight.

GET SYNC-ALL WITH BOTH WI-FI AND GPS.

DOST-PAGASA's specifications for Malacañang Palace.

The best way to have PST in your premises!

COMMON FEATURES:

- ✓ Tamper proof – the time displayed cannot be changed.
- ✓ Weather proof – works outdoors and in all weather conditions.
- ✓ Automatic synchronization – automatically displays Philippine Standard Time, ALL THE TIME.
- ✓ Brownouts are no problem – automatically shows Philippine Standard Time once power is restored.
- ✓ Big digital display is readable from afar or at an angle.
